

NEPEAN BOWHUNTERS 3D ARCHERY

3D Archery consists of shooting at targets (life size models of game animals) at varying distances, often in rough terrain. 3D Archery is very popular with hunters as the goal is to accurately recreate a hunting environment to refine skills and humane hunting in the field.

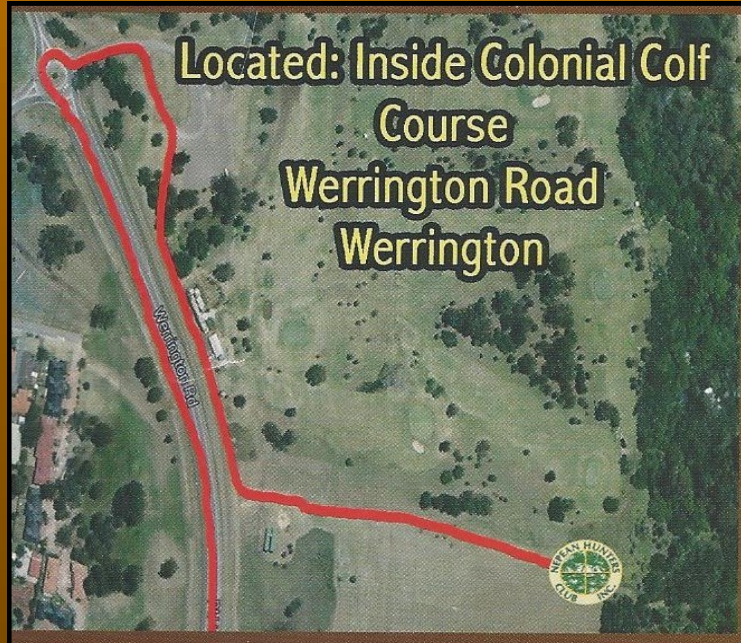

- ◆ The life size game targets have marked score zones.
- ◆ Field tips of the same weight as the intended broadheads are used instead.
- ◆ A round of 3D archery consists of 30 targets, in 2 units of 15.
- ◆ Targets are set at a distance varying from 10 to 40 meters.

2018 3D Shoot Dates

Jan 14th
Feb 11th
Mar 11th
